ACCE POWER Plant at Slantay 40 OF PAGES 1 10 OF ENGLS ANTE OF NEO. 11 July 1945 only a U robbilo power plant consisting of two enginess and ready and resource processes as assessment of the state of the state of the robbilo power plant consisting of two enginess and ready and resource processes as assessment of the state of the robbilo power plant consisting of two enginess and ready are not in the fower plant and the robbilo power plant and ready are robbilo power plant consisting of two enginess are ready as a state of the robbilo power plant in the fower plant and ready are robbilo power plant in the fower plant and ready are robbilo power plant in the fower plant and the robbilo power plant in the fower plant are robbilo power plant and the robbilo power plant and the normal plant grown in the power plant and the normal plant are were planted. The robbilo power plant and the normal plant are were planted by the large particle which plants are robbile to the robbilo power plant and the normal plant are severe planted by the large particle plants are robbile and the robbilo plants are robbile and the robbilo plants are robbile plants and the robbilo plants are robbile plants are robbile plants and the robbility plants are robbile plants are robbile plants and the robbility of the power plant and large cone from these plants are robbile and plants are robbile power plant and large cone from these plants are robbile and plants are robbile power plant from which the power plant the robbility of lake robbile power plant are robbility of the power plant are coupled with each power plant from which the robbility for the power plant from which the robbility f		OFAX 1A			Ç*	_ 71"
THIS IS UNEVALUATED INFORMATION 1. In July 1945 only a E. molido power plant consisting of two engines, its turbine and generator circ. a workshop circ, an effice circ and a radial general resolution of the consisting of two engines, its turbine and generator circ. a workshop circ, an effice circ and a radial general transfer of the construction of the constructi	JUNTRY	USSR (Lening		CONFIDENTIAL		eb. 1952
ANTE OF SUPPLEMENT TO 25 THIS IS UNEVALUATED INFORMATION 1. In July 1915 only a UC mobile power plant consisting of two engines, as well as the state of the second of t		rower Plant	at Slantsy			
THIS IS UNEVALUATED INFORMATION 1. In July 1945 only a Us mobile power plant concisting of two engines, cix turbine and generator care, a veriselep car, an effice cur and a making car was in operation in the Power Plant in Mantai (20°0313/50°0514) leading and Diagram against the object of the robble copering in the 1945 and proved including the first of them started operation in the Power Plant in Mantai (20°0313/50°0514) leading and Diagram against the deep deep care and in the Power Plant in Mantai (20°0313/50°0514) leading and Diagram against the deep deep care into the Hold coperator of the making the second in the color 1948. The mobile power plant and the marine Plant are the second in the color 1948, the second in the correct plant and the marine Plant are the four proviously available boilers burning oil shale were counted. Too large undern toilers were later installed. The first turbine was encoded in October 1946, the second in the paring of 1946, the second in the carring of 1945. These atom turbine were real opinisment and had come from seconds. Source of the marine Plant are the four proviously available boilers burning oil shale were counted in october 1946, the second in the carring of 1945. These atom turbines were all opinisment and had come from seconds. Source of the more were all opinisment and had come from seconds in the counter of the color plant was expected and the constraint of the color plant for which the cit dale was directed to the individual fire plances. 1. The boilers were counted with each generator. The two oil generators had converted to the individual fire plances. 2. The boilers were counted with the converted of the color of the Color fire which the converted to the individual fire plances. 2. The boilers were counted with the color generator. The two oil generators had converted to the large from the Archives of the United States. 2. The section of the Un	CQUIRED			25X1	STO. OF ENCLS.	
THIS IS UNEVALUATED INFORMATION 1. In July 1915 only a UE mobile power plant consisting of two engines, cir turbine and generator care, a workshop car, an effice car and a mobile gear was in operation in the Power Plant in blants! (20°93 W/59°05 W), leading car was in operation in the Power Plant in blants! (20°93 W/59°05 W), leading and the Grant and in elessed engines were installed in a special luibling. The first of them started operating in lay 1917, the second in lettobor 1918. The mobile power plant and the narrise Danel en incover in operation side by side. 2. The power plant was rebuilt after 1945, at first the four proviously available boilers burning oil shale were required. The large unders to librar were later installed. The first turbine was erected in October 1946, the second in the oping of 1946. The count mass arected in October 1946, the second in the oping of 1946. The count incovered and equipment and had come from estentia. However did not long whether the generators had also come from there. It is not the power plant in consignory to be installed at the power plant. In October 1940 the mobile power plant was overhauled and can't turbine was being dismontled in Recongreen; to be installed and can't turbine was being dismontled in Recongreen; to be installed and can't turbine was being dismontled in Recongreen; to be installed and can't turbine was being dismontled in Recongreen; to be installed and can't turbine was being dismontled in Recongreen; the power plant was overhauled and can't turbine was discounted to the individual fire places. 1. The boilers were completed with each generator, the two old generators had a congressively low output. This document is hereby regraded to the individual fire places.				i i		25X
1. In July 19h5 only a US mobile power plant consisting of two engines, six turbins and generator care, a workshop car, an office car and a raching car was in operation in the Power Plant in clanted (20°03 1/50°05'11). Ieminyrad Dilact. After the output of the mobile core plant proved incedenate to to German manice "descel caginac were installed in a special lumbing. The first of them started operating in lay 1/1, the second in a crown 10/18. The mobile power plant and the nurse Capello engines. X1 in operation side by side. 2. The power plant was rebuilt after 10/15, at first the four proviously available boilers burning oil shale were required. The large address to 10/16, the second in the power of 10/16. The power of 10/16 is not the power of				11 왔습		
1. In July 1945 only a Un mobile power plant consisting of two engines, six turbins and generator care, a workshop car, an effice car and a maching car was in operation in the power thant in classes (2003):/5990501) lentigrad Othact. After the output of the mobile mover plant proved incodequate two German marise dissel engines were installed in a special lutbility. The first of them started operating in they 1947, the second in Scholar 1948. The module power plant and the marine Dissel engines were in operation side by side. 2. The new plant was rebuilt after 1945. At first the four proviously available beilers burning oil shale were repaired. The large madera tollows were later installed. The large turbine was erected in October 1946, the second in the spring of 1946. There show turbine was being dismantled in Koomignooff to be installed at the power plant. In October 1946 the mobile power plant was overhanded and sont to the vicinity of Lake Reikal. 3. The used oil shale case from mines I and 2 located in the vicinity of the power plant. It arrived by rail and was emptied on an electrically operated conveyor belt which led to the fourth story of the power plant from which the cit child call was directed to the individual fire places. 1. The boliers were coupled with each generator. The two old generators had a comparatively low output. 1. The location county of the power plant from which the cit of October 1978 from the Archives to the United States. 1. The location county of the power plant from which heart of the United States. 1. The location county of the power plant from which heart of the United States. 1. The location of the Change in Class Change in the County of the United States. 1. The turbine and generator curs, a workshop cur, an office cur and a mashing cur was in operation in the Power flant in Lantes (26°93"/59°05"M). Ieningrad Oblast. After the output of the nobile rower plant proved incompared outputs two German marice Diesell engines were installed in a upecial lubling. The first of them started operating in by 1907, the second in actober 1908. The mobile power plant and the narriee Diesel endines were in operation side by side. X1 in operation side by side. X2. The owner plant was rebuilt after 1945, at first the four previously available beliers burning oil shale were required. The large modern toilers were later installed. The inst turbine was erected in October 1946, the second in the oping of 1948. These steem turbines were clid equipment and had come from astonia. Source did not know whather the generators has also come from there, think turbine was being dismantled in Koonngsborg to be installed at the power plant. In October 1940 the mobile power plant was overhauled and sent to the vicinity of Lake Reikal. 3. The used oil shale came from mines 1 and 2 located to the vicinity of the power plant. It arrived by rail and was emptied on an electrically operated conveyor belt which led to the fourth story of the power plant from which the cil shale was directed to the individual fire places. 4. Two boilers were coupled with each generator. The two old generators had a comparatively low output. Diecument No.				<u> </u>		25X
available boilers burning oil shale were repaired. The large madern boilers were later installed. The first turbine was erected in October 1946, the second in the spring of 1948.
